

## SECTORS

### Sector 1 · Vltava 28 upper part · river

---

One of the best trout fisheries in the Czech Republic. Strict fishing rules (fly-fishing only, barbless hooks only, size limit of 40cm for grayling and 45cm for brown trout) helps to protect the native population of brown trout which, in addition, is still regularly supported by stocking. The venue will not be stocked with rainbow trout before the competition.

**Practice section** for this sector we designed upstream of the competition sector 1, in the channel along Herbertov, downstream of the Sector 3, and in the fishery Vltava 27 downstream of Rožmberk.

## SECTORS

### Sector 2 · Vltava 29 P · river

---

A beautiful section of the river between the Lipno Reservoir and the equalizing reservoir of Lipno 2. The flow is regulated all year-round and it is very stable, offering fishing for abundant native brown trout in a deep forested valley, full of big boulders. Real test of fly fishing skills and physical condition.

**Practice section** for this sector was designed upstream of the competition sector.

## SECTORS

### Sector 3 - Vltava 28 lower part - river

---

One of the best trout fisheries in the Czech Republic. Strict fishing rules (fly-fishing only, barbless hooks only, size limit of 40cm for grayling and 45cm for brown trout) helps to protect the native population of brown trout which is additionally still regularly supported by stocking. The venue also hosts a population of coarse fish species which are eligible during the competition and rainbow trout will be stocked there.

**Practice section** for this sector was designed upstream of the competition sector 1, in the channel along Herbertov; downstream of the Sector 3, and in the fishery Vltava 27 downstream of Rožmberk.

## SECTORS

### Sector 4 · Malše 6, nádrž Květoňov · lake

---

### Sector 5 · Malše 6, nádrž Květoňov · lake - boat

---

Květoňov Lake is a small trout reservoir near the town of Kaplice with an area of 6.5 ha. It was one of the first trout lakes in the Czech Republic and it is annually stocked with about 2.3 tons of rainbow trout and is also famous for big pike. There are three banks of the main basin of the reservoir, and every competitor will fish from each bank for 1 hour during every session.

Fishing from anchored boats will bring a new possibility how to fish the entire area of the reservoir. Rotation will be applied there and competitors will fish from three different boats for 1 hour during every session.

It is possible to **practice the lake fishing** in smaller trout lakes Malče, Dobrkovská Lhotka, Humenice and Soběnov with similar fish stock.
